

PowerSearch

for MS Dynamics CRM

PowerSearch provides a powerful search routine as it allows a quick and easy search across several entities and multiple fields. It helps to simplify the use of CRM by providing one page where all records can be found and favorites can easily be accessed.

Features and Capabilities

- Cross-entity search supporting Out-of-the-Box & Custom CRM entities
- Search for specific values of a certain CRM attribute
- Result-view: grouped by entity and easy to access with a single click
- Apply additional filters on each group to further track down results
- Favorites can be defined to create a single point of information (spi)
- Simple CRM-internal Configuration
